

SPRING INTO LIFE!

Get really close to nature at our environmental education centre and nature reserve with a great variety of wildlife habitats to explore and investigate

SPECIAL WORKSHOPS FOR THIS SEASON

MUNCHING MINIBEASTS (Key stage 1) As creatures emerge from winter hibernation, solve the mystery of the disappearing leaves, and go in search of the smaller beasts of Willsbridge Valley Woods to find out more about where they live and what they eat.

NATURE TREK (Key stage 1 & 2) Take a trek around the range of habitats in the reserve, each one home to a distinct community and discover the signs of Spring. Listen and look out for birds busy establishing territories and nest building. Interactive games on the way illustrate the need for plant and animal adaptation.

POND MAGIC (Key stage 1 & 2) Dip in the upper mill pond to see what lives below the surface and see life cycles in action.

RIVER'S TALE (Key stage 2) Investigate rivers and water life through a kick sampling investigation in Siston Brook, and valley trail identifying key river features. Become water wizards to learn how to reduce our watery footprint. This is an ideal complement to year 5/6s river topic.

BUSHCRAFT (all key stages) While birds build new nests, make your own shelters from nature's building materials. Look for food from nature's larder on wild food walk.

Special Offer: January-March 2010

Full day £5.50 per student (+VAT), usually £6.50 - Adults free

Bookings and Information: 0117 9326885
